ROAD & RAIL SERVICES ANNOUNCES NEW DIVISION.

LOUISVILLE, KY — **Road & Rail Services, Inc.**, a Louisville-based logistics and transportation support company, recently announced the launch of its new Southeast Track Services Division. Based in Spartanburg, SC, the new division provides comprehensive track condition management services that include a full complement of track inspection, maintenance and repair competencies.

“The new division is a natural expansion of the maintenance services we have historically provided for other types of rail assets,” noted Tom Gerstle, CEO of Road & Rail Services and one of the company’s founders.

“It builds on our core competencies and establishes our position as a resource for safe, forward-looking track services.”

Established in 1987, **Road & Rail Services** is a recognized top-tier provider of rail related services to railroads, rail shippers and owners of rail equipment. With a reputation for excellence, the Company provides ***plant and terminal operating services*** (including industrial switching and shortline operations) and ***product handling services*** (including vehicle processing, intermodal operations and bulk commodity transloading); as well as ***maintenance services*** (for railcars, track and other transportation assets). The Company has operations in 18 states and makes a significant impact on the North American rail network with core values that focus on safety and service quality.
